

PRESSURE ACTIVATION DEVICE (PAD-I)**DESCRIPTION**

The PAD-I comes in two standard models: A8170 and A9569 allowing for burst pressures up to 22,000 PSIG. PAD-I are designed for activation from within the tubing or drill string. PAD I standard models are constructed using a body, disc, and support ring providing a one-piece assembly. To provide the highest reliability and traceability, each unit is pressure tested prior to shipping and labeled with burst pressure, temperature and part number.

**PAD-I****TYPICAL USE**

The PAD-I can be used in any application where high accuracy pressure activation is required:

- Downhole completion
- Perforating
- Cementing
- Drill stem testing
- Gravel Pack
- Stimulation
- Drilling
- Other special applications

FEATURES AND BENEFITS

- Rapid Response Program
- Certified burst pressures with tight tolerance to ensure high accuracy and reliability
- Corrosion resistant materials
- Compact one-piece design
- High operating ratio
- Allows trouble free operation in corrosive environments
- Eliminates shear pin devices
- Easy installation and removal
- Positive sealing capability

SPECIFICATIONS

Material of Construction	A8170 Body - 316 SST, Rupture Disc - Inconel® 600 A9569 Body - 17-4 PH SST, Rupture Disc - Inconel® 600
Maximum Operating Ratio	90% of burst pressure
Maximum Back Pressure	Minimal – Consult Factory
Standard Burst Pressure Range	1,000-20,000 PSIG in 500 PSIG increments
Burst Tolerance	±100 PSIG for pressures 1,000 PSIG – 4,500 PSIG ±2% for pressures 5,000 PSIG and greater
Threads	11/16" - 24UNEF-2A
Maximum Temperature	Up to 450°F (232°C)

Note: Other sizes, pressures, tolerances and materials, including Inconel 625, are available upon request.
