Replacement Parts You Can Trust

Flowserve offers superior quality OEM replacement parts for its MN, MF, MSX and VTP water resource pumps. Unlike non-OEM replicated parts, Flowserve replacement parts are engineered to provide outstanding pump performance and extended service life.

Flowserve replacement parts are produced through advanced design tools, materials and manufacturing techniques to ensure:

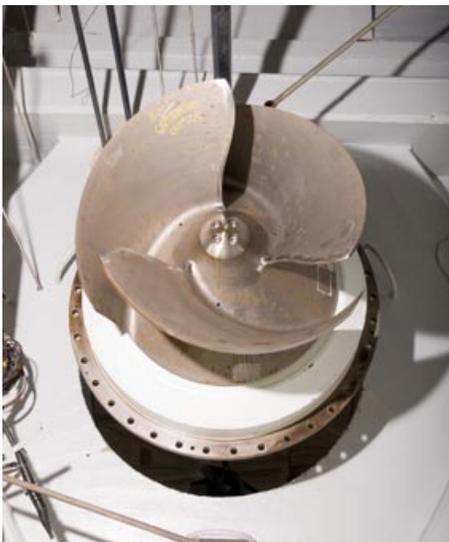

- Hydraulic performance and efficiencies that lower operating costs
- Mechanical reliability that extends equipment life
- Optimal material composition for long life and safe operation

Flowserve parts are manufactured with a quality focus on the long-term benefits and savings that are realized over the life cycle of the pump, making Flowserve the true low-cost provider.

Flowserve is dedicated to innovative parts management programs that optimize inventories to ensure orders can be fulfilled to original factory specifications without delay.

This Flowserve high-quality impeller is cast and machined to tight tolerances to ensure high efficiency and performance.

Why Choose Flowserve Replacement Parts?

- **ISO Certified** – Every genuine Flowserve part is manufactured in facilities that are ISO certified and are backed by a full factory warranty.
- **Quick Response Programs** – Innovative quick response programs from Flowserve deliver non-stock components quickly and according to the latest design specifications.
- **Materials Expertise** – With a global staff of materials experts and a complete range of alloys and non-metallic components, Flowserve customers are assured the proper applications of materials for their applications.
- **Precise Tolerances** – Unlike non-OEM parts, Flowserve replacements parts are designed to consistently meet precise dimensional tolerances. This eliminates poor performance and even catastrophic results that can occur from small errors.
- **Automated Inventory Management** – Flowserve offers innovative management programs that optimize inventories, eliminate waste and reduce costs.
- **Superior Design** – Flowserve incorporates the latest design changes and refinements to improve efficiency and reliability. Non-OEM parts suppliers frequently replicate worn parts which can lead to sacrifices in performance and service life.
- **Upgrades** – Flowserve also offers a full range of services for pump upgrades.
